320604042-CS	40 x 48	Full-Gauge	125/cs

EcoPro® Low Density Garbage Bags

These bags are manufactured with 100% recycled plastic to make 100% recyclable products that are 100% oxo-degradable. They are designed with leak-resistant, flat bottom seals and are excellent for your toughest applications. The bags come individually folded and are singly dispensed through the pop out opening on the front of the case for quick and easy access by your staff.

High Density

High Density Garbage Bags

Pro-Link high density liners are the best choice for most common applications, such as office, restroom and waste paper. These liners are extremely strong even with lower gauges, distributing trash weight evenly throughout the bag, virtually guaranteeing no leakage.

Available in frosted and black.

327424800-CS	42" x 48"	90/cs

Specialty

PRO-LINK® Preferred Series Blue Garbage Bags

This Premium Garbage Bag is manufactured from 100% Prime Octene resin. The result is a bag that offers optimal stretch performance and puncture resistance as well as an incredible strength to gauge ratio. This bag is superior in strength compared to standard bag and provides the same performance as heavier gauged CoEx bags, while at a lighter gauge, resulting in cost savings without loss in performance. The bags come individually folded and are singly dispensed through the pop out opening on the front of the case for quick and easy access by your staff.

Janibell® Liners

Strong, eco-friendly and easy to use! Designed to securely hold your garbage without breaking, tearing or falling apart. In addition to being made with 20% recycled material, the Janibell liner material includes a proprietary resin additive that is activated underground in landfills. The result: your Janibell bags will fully degrade in landfill or underground in 1 to 5 years. Janibell's continuous bag liners come in an accordion-folded roll that allows you to create different sizes of bags at any given time and take out the trash in about 30% of the time that it would take with a traditional trash container. All you do is pull, cut with built-in safety cutter and tie. There's never any waste of bag material. Each liner tube makes 30 full bags (or many more smaller ones), with the liner's total length dependent on the size of the corresponding trash container. So when you buy a 3-pack of liner refills, you're buying at least 90 bags.
