Vectair V-Air® Solid MVP Dispensers

Part of the Vectair MVP dispenser range. It is discreet and complementary to virtually all interior surroundings, allowing for enhanced natural airflow. It is designed to carry the multi-award winning Vectair V-Air® SOLID Air Freshener Multi Phasing Refill Cartridges. Utilizes our pioneering multi-phasing, sub micron air freshener technology through a passive dispenser and solid fragrance cartridge, delivering consistent fragrance intensity and avoiding fragrance fatigue. Secure and durable, yet each air freshener refill is visible from both sides to enable enhanced natural airflow which provides superior multi-phasing fragrance delivery for up to 60 days, free of batteries, HFCs, propellants and solvents.

Janibell® Liners

Strong, eco-friendly and easy to use! Designed to securely hold your garbage without breaking, tearing or falling apart. In addition to being made with 20% recycled material, the Janibell liner material includes a proprietary resin additive that is activated underground in landfills. The result: your Janibell bags will fully degrade in landfill or underground in 1 to 5 years. Janibell's continuous bag liners come in an accordion-folded roll that allows you to create different sizes of bags at any given time and take out the trash in about 30% of the time that it would take with a traditional trash container. All you do is pull, cut with built-in safety cutter and tie. There's never any waste of bag material. Each liner tube makes 30 full bags (or many more smaller ones), with the liner's total length dependent on the size of the corresponding trash container. So when you buy a 3-pack of liner refills, you're buying at least 90 bags.
