GMProtect

DISINFECTION MISTER

Ideal for Disinfection of All Public Spaces

- Arenas and Gyms
- Day Care Facilities
- Nursing Homes
- Churches
- Schools
- Schools

The GM Protect Mister is a fast and efficient way to apply disinfectants to large spaces.

The GM Protect Mister is specifically designed for use with GML Disinfectant RTU, a Health Canada approved disinfectant that is expected to inactivate the 2019 novel Coronavirus (SARS-CoV-2, COVID-19).

Fast and Effective

Using a Mister can effectively disinfect large areas much more quickly than traditional spray & wipe methods. It delivers disinfectant evenly over surfaces allowing for improved coverage and proper dwell time.

Safe to Use

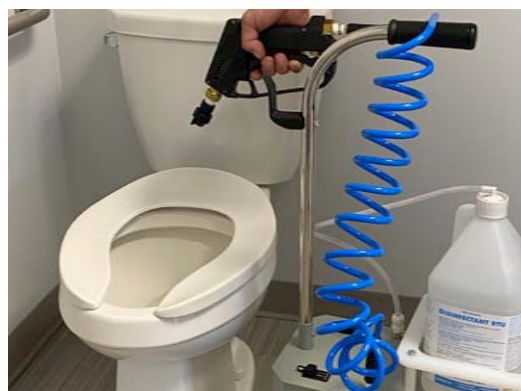

The GM Protect Mister was designed with ergonomics in mind. With large rolling wheels and an ergonomic handle the GM Protect is easy to manoeuvre.

Built to Last

The GM Protect has a 12 volt rechargeable system the unit easily provides a full 8 hours of continuous use. A 3 hour recharge time ensures minimal downtime.

Locally Manufactured

The GM Protect Mister is designed and manufactured in Barrie, Ontario.
